

AIR 1 provides uplifting, commercial free music to listeners which is a valuable relief from the sex/drug/violence oriented music available to us and especially to our children today. Our community is experiencing a strong revival of the principles this country was founded on partially due to the effect of Christian Radio. Crime statistics are going down for the first time in many years. With the media so full of negative programming, keeping an option like AIR 1 available is not only invaluable, but seems only fair. There is no restriction on the amount of worldly media out there.
